

## GN 9350

### Style and superior sound. Wireless desk and IP telephony.

The dual-connection GN 9350 wireless headset provides high performance in both traditional and PC-based telephone environments. That means you can expand – or even change – your telephone system without having to purchase new headsets. In short, the GN 9350 provides all the benefits of hands-free mobility in a lightweight, ergonomic, and futureproof design.

- DSP and IntelliTone™ for superb sound quality and greater hearing protection
- Futureproof investment thanks to built-in USB interface for IP telephony
- LCD display for easy set-up of personal sound preferences
- Noise-cancelling microphone for reduced background noise
- Around-the-clock talk time with optional second battery
- Lightweight design and multiple wearing styles – neckband included
- Multi-unit conferencing capability

The GN 9350 makes everything sound better. State-of-the-art Digital Signal Processing (DSP) technology removes impurities from the incoming signal, enriches sound quality, and maintains a safe consistent volume level. The GN 9350's sleek boom-arm with noise-cancelling microphone means your voice is always transmitted clearly.

The GN 9350 is also the first wireless headset for IP telephony featuring wideband audio. Its astounding 6.8 kHz range is more than twice that of conventional telephony! Not only does high-definition sound give you the feeling of a true “face-to-face” conversation, it also helps increase your productivity because you hear every detail the first time.

Exceptionally intuitive and easy to use, the GN 9350 features a sophisticated LCD display on the base unit. This lets you set call parameters, such as volume and audio output, to suit your individual preference. And with a wireless range of up to 100 metres and conference-call capability the GN 9350 expands your communications potential. An optional second battery can be kept charged in the base, which can be hot-swapped to provide around-the-clock talk time.

# GN 9350

Feature	Benefit
Dual connection	The GN 9350 is a dual connection wireless headset, connecting to both your standard desk telephone and your computer for PC-based IP telephony (softphones). For compatibility, please check <a href="http://www.gnnetcom.com">www.gnnetcom.com</a> .
Up to 100 metres office range	With a range of 100 metres in a typical office environment, you'll be able to walk, talk and work throughout the office environment.
Talk time: <ul style="list-style-type: none"> <li>Up to 6 hours IP talk time</li> <li>Up to 9 hours telephone talk time</li> </ul>	The GN 9350 comes with a single 9-hour battery. A second, hot-swappable battery is available as an accessory.
Standby-time: <ul style="list-style-type: none"> <li>43 hours with power on base</li> <li>120 hours without power on base</li> </ul>	Your GN 9350 is always standing by, ready for action.
Battery recharging time: 3 hours	The accessory battery of the GN 9350 quickly charges in its dock so your calls will never be cut short.
Battery status indicator	The four LEDs in the base keep you informed of your headset battery status at all times.
Noise-cancelling microphone	The GN 9350's sleek boom-arm with noise-cancelling microphone ensures your voice is always transmitted clearly.
200 Hz – 6.8 kHz full audio bandwidth using IP telephony	The GN 9350 is the first wireless headset with wideband, high definition sound quality so everything sounds crystal clear.
200 Hz – 3.5 kHz audio bandwidth in telephony mode	The sound quality of traditional telephony with the added bonus of hands-free mobility.
Mute function	The mute button is easily accessed, preventing your voice from being transmitted when you need to consult with a colleague.
On-line indication	Easily recognised LED illumination informs you of your on-line status.
Volume control	Intuitive controls facilitate easy volume correction.
DSP (Digital Signal Processing)	Sophisticated DSP technology processes the incoming signal and removes impurities, giving you incredibly clear, rich sound.
Auto-volume	DSP auto-volume automatically eliminates fluctuations, adjusting the volume of all incoming calls to the same, consistent level.
Base unit display (LCD)	Easy setup of call parameters to meet your personal preferences.
3 wearing styles: <ul style="list-style-type: none"> <li>Over-the-head (headband)</li> <li>On-the-ear (ear hook)</li> <li>Behind-the-neck (neckband)</li> </ul>	There is a wearing style to suit every preference, providing optimum working comfort.
Multi-unit conferencing	Up to four GN 9350 headsets can dock with one base to form a conference call. Fully mobile, convenient conference calling without the conference room or traditional crackling telephone conferencing equipment.
Remote call answering/ending	The GN 9350 features remote call answer/end functionality, letting you answer/end calls while away from your desk. The GN 9350 works with: <ul style="list-style-type: none"> <li>The GN 1000 remote handset lifter, which mechanically lifts/lowers your telephone's handset.</li> <li>A telephone's built-in electronic hook switch (EHS), which electronically answers/ends calls.</li> </ul>
PeakStop™ technology – max 118 dB SPL (RMS)	The GN 9350 guards against sudden noise spikes from the telephone network.
Digital security encryption	The GN 9350 digitally encrypts your calls, giving you complete calling security and conversation confidentiality.

<b>Technology:</b>	1.8 GHz DECT 63 mW transmission power
<b>Warranty:</b>	2-year warranty
<b>Specifications:</b>	Operating temp.: 10° C/40° C Storage temp.: 0° C/40° C Headset weight: 26 g Base weight: 255 g
<b>Compliance:</b>	TT4 – world's toughest standard for noise and acoustic shock EU safety regulations – cumulative noise exposure should never exceed 85 dB SPL

The GN 9350 meets the electric strength test and impulse test requirements of the international standard IEC 60950-1. It also meets EN 60950, AS/NZS3260, and UL 60950 standards.
